

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the weather and traffic programming that I demand and deserve. Information provided by XP Radio is not available from local stations, and if available is inaccurate, sporadic, not timely and restricted to the range of local transmitters. Service provided by XM Radio is paid service, and I strongly request the U.S. Government not to interfere with my ability to purchase the service I need and I find valuable. I also believe that except of limiting my freedom as a customer, the above mentioned petition is unconstitutional and restricts my First Amendment rights.
